# K3 Dental Unit Chair

The K3 utilizes a high-performance hydraulic motor, which is affixed to the floor to minimize noise and trembling during height adjustments. The oversized backrest, seat and headrest are all ergonomically designed to enhance patient comfort and experience. With the adjustable height, the dentist can easily perform treatment in different positions.

## BUILT TO LAST

Going through 10,000 rounds of height adjustments and 5 years of power on/off testing without failures, the K3 unit chair is optimized for perfection.

## SMART INVESTMENT

With exceptional quality and durability, every K3 unit chair meets all expectations at an affordable price.

## FLEXIBLE INTEGRATION

Built with an optimized streamlined operation in mind, the K3 unit chair offers all of your needs within perfect reach.
