

SM5 Surgical Motor

Our SM5 is a high-performance yet lightweight surgical engine designed for modern implant surgery. With its smart driver control, flexible tubing, and intuitive one-touch calibration, the SM5 maximizes safety, precision, and clinician comfort.

INTELLIGENT TORQUE CONSISTENCY

Maintains steady torque regardless of RPM, safeguarding surgical accuracy.

ONE-TOUCH AUTO-CALIBRATION

Instantly adjusts torque settings with a single button - no external tools needed.

FLEXIBLE IRRIGATION LINE DESIGN

Separated and slimmer tubing increases handling flexibility without compromising durability.

Product Details

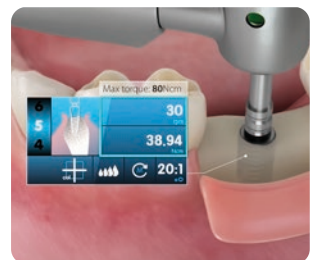

Outstanding chucking force, precise drilling and stable holding ability of the implant

Outstanding quality for safe and secure surgery

Precise overview can be checked with ease during the surgery on the LCD panel

Stability can be checked with the displayed torque value and RPM
